Housing Monitor

national australia bank

November 2026

- Dwelling prices across the combined capitals declined for a seventh consecutive month, falling 1.4% mom in October to be 8.1% below their March 2026 peak. We expect dwelling prices to decline around 14% peak-to-trough (prev. 11%), with a floor in house prices likely in Q2 2027.
- After downward revisions to recent months, Brisbane and Perth are now leading price falls. In October, prices were down 2.0% and 1.7% mom, respectively, to be more than 8% below recent peaks. The pace of price falls has slowed in Melbourne (-0.8% mom). Melbourne prices are 7.8% below their peak, while Sydney prices are 10.1% lower.
- New housing loan commitment values declined 16% qoq in Q3, led by a sharp 32% fall in investor lending, while owner-occupier lending declined by 5%. The fall in loan commitments was concentrated in June and July, although they did continue to trend lower through Q3.
- House building material costs rose 1.0% qoq in Q3 to be 3.9% higher over the year amid rising raw materials, freight and fuel costs. That said, inflation for newly completed dwellings slowed in recent months amid cooling demand.
- Median days on market has continued to rise nationally. As with prices, that trend is showing signs of slowing in Melbourne over the past couple of months. Median days on market has approximately tripled in Brisbane and Perth, from historically low levels at the start of the year.
- Dwelling approvals have been resilient to the broader shift in the housing market, although the uptrend in detached house approvals has stalled.
- The rental vacancy rate remains low but has trended higher alongside cyclical cooling in the economy, most notably in WA, SA and NSW. Advertised rents growth has slowed, led by NSW and Vic.

National

- National dwelling prices fell 1.2% mom to be 6.7% below the recent peak, but remain around 50% higher compared to late 2019. Price declines in the combined capitals have outpaced regional price falls.
- The rental vacancy rate remains low, but has risen over recent months. Advertised rents growth remains high, but has also slowed.

States and Territories

- NAB Economics now forecasts dwelling prices across the combined capitals to fall by 9% over 2026 (prev. 8%), and to record a peak-to-trough decline of around 14% (prev. 11%) before prices find a floor in Q2 2027.
- Revisions to our dwelling price forecasts have been driven by sharper than expected falls in Perth and Brisbane, partly reflecting downward revisions to prior data.

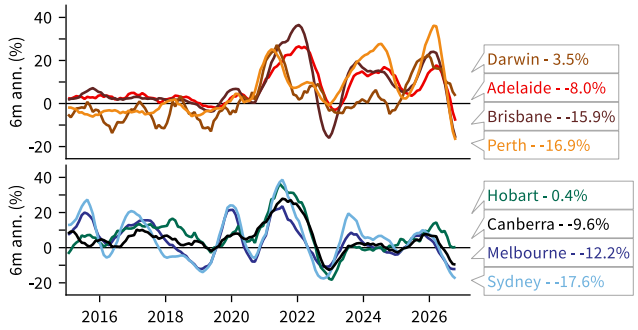

Dwelling Price Forecasts (%)	2023	2024	2025	2026	2027
Sydney	11	3	7	-13	-4
Melbourne	4	-2	5	-9	-1

Housing Lending

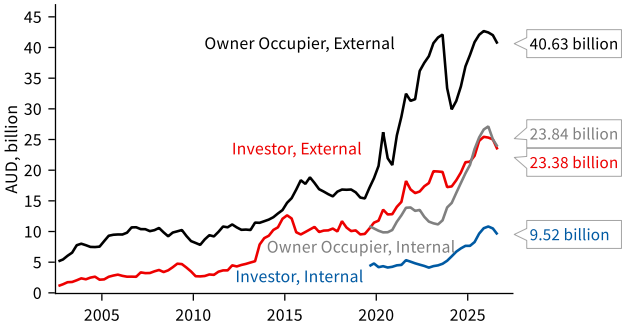

- The value of new housing loan commitments fell by 15.5% qoq in Q3, led by a 32.3% decline in investor loan commitments, while owner-occupier loan commitments fell 5.3% qoq.
- Only a small share of new housing lending is at high debt to income or loan to valuation ratios. However, owner-occupied loans with LVRs ≥90% ticked up late last year, alongside the 5% deposit First Home Guarantee scheme.

Pipeline and Costs

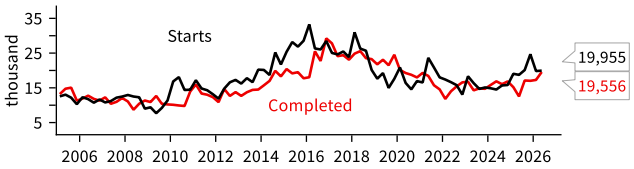

- House building material costs rose 1.0% qoq in Q3, reflecting higher raw material, freight and fuel costs.
- Apartment and townhouse starts were in line with completions in Q2, while detached house starts are still outpacing completions.
- The pipeline of residential building work yet to be done remains elevated in QLD, WA and SA.
