GETTING TO KNOW YOUR NAB EFTPOS MOBILE TERMINAL (CONTINUED)

Using the Touchscreen
The NAB EFTPOS Mobile terminal has a colour touchscreen. Navigating using the touchscreen is easy and intuitive for your customers. Simply follow the prompts and tap the option on the screen to make a selection.

Using the Keypad

The **Menu** button is used to access the terminal menu options

The **CONTINUE** button on the keypad is used to accept a selected option highlighted or to accept data entry. This button is also used to power on the terminal

The **CLEAR** button on the keypad is used for clearing entered data or moving back to the previous screen

The **CANCEL** button on the keypad is used to cancel the current function and return to the Home screen

The **Function** button on the keypad is used to perform certain advanced functions on the terminal

Press [F2 ▼] on the touchscreen to scroll **down** the menu options
Press [F3 ▲] on the touchscreen to scroll **up** the menu options

Basic Functions

**Power on**
Press the green **CONTINUE** key

**Power off**
Remove the terminal from its base and any power source. Press and hold the **Func** and yellow **CLEAR** keys together

**Cancel an action**
Press the red **CANCEL** button

**Change terminal passwords**
Contact the Merchant Service Centre

**Idle State**
If there is no activity on the terminal for 60 seconds, the terminal will return to the Home screen
The NAB EFTPOS Mobile terminal comes ready with the capability to accept Contactless credit card payments, commonly referred to as ‘tap and go’. Your customer’s chip card must have the following symbol in order to use the Contactless feature.

What are the advantages of Contactless capability?
Quick and easy to use – simply tap the chip card on the landing zone, where the following icon displays at the top of the terminal.

If the sale is less than $100, there is no need for your customer to enter a PIN or sign the merchant receipt.
If the sale is over $100, your customer will be required to enter a PIN or sign the merchant receipt.
Printing the customer receipt is optional regardless of the transaction amount.

Are there any restrictions in using Contactless?
If the sale amount is greater than $250, your customer will be asked by the terminal to insert or swipe their card.
Only a Sale transaction can be made using Contactless.
UNDERSTANDING YOUR
NAB EFTPOS MOBILE TERMINAL INTEGRATED WITH YOUR POS

NAB EFTPOS Mobile terminals integrate with your Point of Sale (POS) solution to process credit, debit and charge card transactions. When the card payment option is selected, the POS integration software provided by PC-EFTPOS, interacts with the NAB EFTPOS Mobile terminal to process the transaction. The outcome of the transaction is then automatically updated in your POS solution, making it easy for you to reconcile the payments and shorten payment processing time.

Using NAB EFTPOS Mobile terminals with a POS

NAB EFTPOS Mobile terminals are designed to work with your PC-EFTPOS-certified POS system. The POS system sends the total amount to the NAB EFTPOS Mobile terminal to finalise the payment.

The solution can be configured to work with different types of communications depending on your environment. These include:

- 3G
- Broadband Internet via Ethernet
- Broadband Internet via WiFi
- Dial Up

Your NAB EFTPOS Mobile terminal and base are paired via Bluetooth. This enables the terminal to continue to operate normally when it is separated from the base.

You can also choose to have all transaction receipts printed directly from your POS system or have the terminal print out the transaction receipt.

Processing transactions with a NAB EFTPOS Mobile terminal integrated with your POS

Your NAB EFTPOS Mobile terminal is integrated with your Point of Sale (POS) system.

For all transaction types, the merchant initiates the transaction on the POS system and follows the system prompts displayed on the POS screen. The customer follows the prompts displayed on the terminal to process the payment.

Considerations

Transactions completed using an Australian-issued card need to be approved by a PIN. Some transactions, such as Refunds, may prompt for a signature.

Transactions completed using an internationally-issued card may need to be approved by a signature.

If the signature does not match that on the card, you need to decline the transaction. The terminal will produce a declined receipt.

As for all transactions types, if a transaction is declined, your customer may need to provide another form of payment to complete the transaction.

For any transaction errors or issues, please refer to your POS manual, or call the NAB Integrated Helpdesk.
UNDERSTANDING YOUR NAB EFTPOS MOBILE TERMINAL

Your NAB EFTPOS Mobile terminal can be configured to work with different types of communications depending on your environment. These include:

- 3G
- Broadband Internet via Ethernet
- Broadband Internet via WiFi
- Dial Up

The NAB EFTPOS Mobile terminal and base are paired via Bluetooth. This enables the terminal to continue to operate normally when it is separated from the base.

Navigating the Menu

To access the Menu, press the Menu button.

There are 4 main menu items

Tap to select a menu option.

Processing transactions using your NAB EFTPOS Mobile terminal

All cards can be used on the terminal using:

- Tap (using the contactless feature)
- Insert (using the chip), or
- Swipe (using the magnetic stripe)
The NAB EFTPOS Mobile terminal can support multiple merchants. This allows multiple merchants to process transactions on one terminal with separate settlements for each individual merchant.

If your terminal supports multiple merchants, then there must be a Primary merchant identified. The Primary merchant is the merchant to whom the terminal is provided under the Merchant Agreement and who is responsible for the terminal rental.

The additional merchants who use the terminal are the Secondary merchants. A Secondary merchant has been granted the use of the terminal by the Primary merchant.

Note: This function is not available on your NAB EFTPOS Mobile terminal when your terminal is integrated with your POS.

**Processing transactions on a terminal that supports multiple merchants**

When you process transactions on a terminal that supports multiple merchants, the **SELECT MERCHANT** screen displays, prompting you to select the relevant merchant.

If the merchant you require is not displayed on the screen, scroll down / up using touch screen on PINPad to move between previous and next screen.

Tap the name of the required merchant on the screen and continue with the transaction as described in this guide.

Some functions (such as Log on or Manual Settlement) that display the **SELECT MERCHANT** screen, provide an option on this screen to select **All Merchants**.

Tap **All Merchants** when you want to perform the function for all merchants on the terminal at once.
NAB EFTPOS MOBILE SALE
– TAP

Note: This function is available on NAB EFTPOS Mobile terminals integrated with your POS, however some steps may not apply or may be initiated via the POS.

Step 1
Enter the sale amount directly on the screen and press CONTINUE

Step 2
Ask customer to TAP their card

Ensure your customer holds their card over the contactless logo until all four bars ‘light up’ and the terminal sounds a beep. This will only take a few seconds.

Step 3
Processing message is displayed

Step 4
An acknowledgement displays once the sale has been approved and the merchant receipt option to print is displayed.
NAB EFTPOS MOBILE SALE – TAP (CONTINUED)

Step 5
Press Yes to print the customer receipt copy if required

**NAB EFTPOS MOBILE REFUNDS (CONTINUED)**

**Step 9**
An acknowledgement displays once the refund has been approved and the merchant receipt with signature request will print.
Remove card from the terminal if inserted.

**Step 10**
Press **Yes** to print the customer receipt if required.
The customer will receive the refund within 2 to 4 business days for Visa, MasterCard and EFTPOS transactions and up to 5 business days for UnionPay cards.

**Note:**
For your protection against fraud, please ensure your passwords are changed regularly.
Always compare the signature on the card with the signature on the receipt.
You should always swipe or insert the card through the terminal rather than key entering the card information to reduce your exposure to fraudulent transactions.
NAB EFTPOS MOBILE
REVIEW DETAILS OF THE LAST TRANSACTION

This function allows you to review the details of the last transaction processed on the terminal screen before you proceed
to print a duplicate receipt.

PRE-AUTHORISATION

The Pre-Authorisation feature is optional. You may enable or disable this feature by contacting the Merchant Service Centre. Pre-Authorisation is used to reserve a value amount on a cardholder’s account. The value amount is generally held for up to 7 days depending on the cardholder’s financial institution.

The funds held are not debited from the cardholder’s account until final payment, a Pre-Authorisation Completion, is processed. It is important to retain the Pre-Authorisation merchant receipt as the pre-authorisation completion cannot be completed without the Approval Code from the receipt.

Pre-Authorisations are available for credit cards only.

Note: This function is available on NAB EFTPOS Mobile terminals integrated with your POS, however some steps may not apply or may be initiated via the POS.

**Step 1**
Press 1 in the **Menu** to select ‘Transaction’

**Step 2**

NAB EFTPOS MOBILE
PRE-AUTHORISATION COMPLETION

The Pre-Authorisation Completion process looks up the original pre-authorisation record, confirms the transaction value and puts the pre-authorisation payment through as a transaction.

A Pre-Authorisation Completion transaction generally must be performed between 2 to 14 days from when the Pre-Authorisation was processed. This period is dependent on the type of business you operate.

The value amount is generally held for up to 7 days on pre-authorisation, depending on the cardholder’s financial institution.

Note: This function is available on NAB EFTPOS Mobile terminals integrated with your POS, however some steps may not apply or may be initiated via the POS.

Step 1
Press the Menu key, then press 1 to select ‘Transaction’

Step 2
Press 5 to select ‘Pre-Auth’

Step 3
Press 2 to select ‘Completion’

Step 4
Enter the pre-authorisation completion amount
**Step 5**
Enter the 6 digit **APPROVAL CODE** from the merchant receipt

![Sale Completion Screen](image)

**Step 6**
Press **ENTER** to confirm the pre-authorisation transaction retrieved by the terminal.

![Auth Adj Screen](image)

**Step 6a**
Ask customer to **INSERT** or **SWIPE** their card

![Credit Card Insert Screen](image)

If the pre-authorisation transaction is not found on the terminal, the customer’s credit card will be required. Proceed to Step 6a. Otherwise, proceed to Step 7.

**Step 6b**
Enter the **STAN** from the pre-authorisation merchant receipt and press **ENTER**

![Enter STAN Screen](image)
Step 6c
Enter the RRN from the pre-authorisation merchant receipt and press ENTER

Step 6d
Enter the completion amount and press ENTER

Step 6e

PRE AUTHORISATION COMPLETION (CONTINUED)

Step 6g
Enter the Issuer STAN from the pre-authorisation merchant receipt and press ENTER

Step 7
Press ENTER to confirm the completion transaction. The merchant receipt will print automatically.

Step 6h
Enter the Issuer RRN from the pre-authorisation merchant receipt and press ENTER

Step 8
Press Yes to print the customer receipt if required
The pre-authorisation adjustment feature is optional and is available if you are a merchant operating in the following business types:

- Eating places and restaurants
- Drinking places, bars, taverns, nightclubs etc
- Local and suburban commuter passenger transportation, including ferries
- Passenger railways and bus lines
- Recreational service miscellaneous (aircraft rental) and recreational service miscellaneous (bicycle rental)
- Motorcycle rental, boat rental equipment rental and motor home rental
- Trailer park or campground
- Amusement parks, circuses, carnivals, and fortune tellers
- Cruise lines
- Lodging merchants
- Vehicle rental
- Card absent taxicabs and limousines

The pre-authorisation adjustment process looks up the original pre-authorisation record and allows the authorisation value to be changed (up or down).

The funds held are not debited from the cardholder’s account until final payment, a pre-authorisation completion, is processed. It is important to retain the pre-authorisation adjustment merchant receipt as the pre-authorisation completion cannot be completed without the Approval Code from the receipt.

Pre-authorisation adjustment is available for credit cards only.

**Note:** This feature is available on NAB EFTPOS Mobile terminals integrated with your POS, however some steps may not apply or may be initiated via the POS.

**Step 1**

Please wait
This function is for use when processing card payments for orders received by mail or telephone or initiated over the Internet (ECOM).

MOTO transactions do not incur a surcharge and the transaction will display as MOTO on the receipt and settlement transaction listing. MOTO transactions can be processed on credit or charge cards only.

Note: This function is available on NAB EFTPOS Mobile terminals integrated with your POS, however some steps may not apply or may be initiated via the POS.

### Step 1
Press 1 in the **Menu** to select **Transaction**

### Step 2
Press 7 to select **MOTO**

### Step 3
Enter the **MOTO sale amount**

### Step 4
Commence entering the customer’s **card number**
Step 5
Complete entering the customer’s card number, and press CONTINUE.

Step 6
Enter the card expiry date receipt in MMYY format.

Step 7
Press the corresponding number to select type of order.

Step 8
Press the corresponding number to select frequency of transaction.
NAB EFTPOS MOBILE
MOTO (CONTINUED)

Step 9
Confirm the MOTO transaction

Step 10
Processing message is displayed

Step 11
An acknowledgement displays once the sale has been approved and the merchant receipt will print.

Step 12
Press Yes to print the customer receipt if required.
**Step 13**

Printing message displays.
The manual key entry function is only available if approved by NAB. To submit a request for this function, contact the Merchant Service Centre.

It is recommended that merchants do not manually enter card details without first attempting to swipe or insert the card in the card readers. Using this function will require customer signature verification, and any surcharge that has been set on the terminal will apply to the sale.

Note: This function is available on NAB EFTPOS Mobile terminals integrated with your POS, however some steps may not apply or may be initiated via the POS.

**Step 1**
Enter the **sale amount** directly on the screen and press **CONTINUE**

**Step 2**
Ask customer to **TAP** their card

**Step 3**
Complete entering the customer’s **card number**, and press **ENTER**

**Step 4**
Enter the **card expiry date** in **MMYY** format
Step 5
Enter the **CCV number** from the card and press **ENTER**

Step 6
Press **ENTER** to confirm the transaction

Step 7
Processing message is displayed

NAB EFTPOS MOBILE
VOID LAST

This function allows the last transaction performed to be cancelled. This is an optional feature and you may enable or disable this feature by contacting the Merchant Service Centre.

A void last transaction will not appear on the Merchant Statement, Settlement report or on the cardholder’s statement.

**Note:** This function is only available for credit transactions. If you need to cancel a debit (cheque or savings) transaction, a refund must be processed.

**Note:** This function is not available on your NAB EFTPOS Mobile terminal when your terminal is integrated with your POS.

**Step 1**
Press 3 in the **Menu** to select **Batch**

**Step 2**
Press 5 to select **Void Last**

**Step 3**
Review the transaction details and press **ENTER** to confirm

The merchant copy of the voided receipt will print automatically.

**Step 4**
Processing message displays
**NAB EFTPOS MOBILE VOID LAST (CONTINUED)**

**Step 5**
Press **YES** to print the customer receipt if required.

**Step 6**

**Step 7**
VOID transaction accepted
There are several functions and settings that you can set directly on the terminal. These settings enable you to:

- Change how certain functions work (such as changing the time that automatic settlement begins for the terminal, or prompting for a transaction listing printout at settlement)
- Change values used on the terminal (such as changing your merchant password)
- Change the communication method your terminal uses
- Turn some functionality on or off (such as charging a surcharge for certain credit card transactions).
This function allows you to set-up the terminal to automatically settle every day at a preferred time that you specify. The terminal must be switched on for automatic settlement to occur. For overnight settlements, it is recommended the terminal remains on its charging base.

**Note:** This function is not available on your NAB EFTPOS Mobile terminal when your terminal is integrated with your POS.

**Step 1**
Press the **Func** key

**Step 2**
Enter 13 using the PINpad and press **ENTER**

**Step 3**
Press **ENTER** to change the time

**Step 4**
Enter the new time in the 24 hour **HH:MM** format, and press **ENTER**

NAB EFTPOS MOBILE
SURCHARGE

Merchants have the ability to charge customers an additional fee for paying by debit or credit cards – surcharging. The surcharge can be either a fixed fee or a percentage fee based on the value of the transaction.

A surcharge fixed fee amount that is greater than $3 or a percentage amount greater than 15% is prohibited by the terminal.

If you do decide to charge customers a fee for paying by a debit or credit card you will need to make sure you do not act in a misleading or deceptive way.

You should ensure customers are aware of:

- The extra charge, and
- The surcharge rate before the transaction is entered into.

This can be done in many ways, including in-store notices or prominent messages on bills. Customers can choose whether to pay the card fee or to use another form of payment, for example cash. The customer will have the option on the terminal screen to not accept the surcharge and cancel the transaction.

**Note:** This function is not available on your NAB EFTPOS Mobile terminal when your terminal is integrated with your POS.
NAB EFTPOS Mobile
SURCHARGE – TURN ON/OFF

Note: This function is not available on your NAB EFTPOS Mobile terminal when your terminal is integrated with your POS.

**Step 1**
Press 4 in the Menu to select Terminal

**Step 2**
Press 5 to select Surcharging

**Step 3**
Press F1 to select Enable

**Step 4**
Surcharging is enabled. Press CANCEL
NAB EFTPOS MOBILE
SURCHARGE – CARD ACCEPTANCE SET-UP

Note: This function is not available on your NAB EFTPOS Mobile terminal when your terminal is integrated with your POS.

Step 1
Press 4 in the Menu to select Terminal

Step 2
Press 5 to select Surcharging

Step 3
Press ENTER

Step 4
Use the F2 and F3 buttons to scroll to the card issuer, and press ENTER
NAB EFTPOS MOBILE
SURCHARGE – CARD ACCEPTANCE SET-UP (CONTINUED)

Step 5
Press 1 to enter a Fixed Fee or 2 to enter a Percentage of the Total.

Step 6
Enter the fixed fee amount or percentage of the total rate, and press ENTER.

Step 7
Press ENTER to confirm the value entered.

Step 8
The value entered will display in the Select Issuer screen.
Repeat steps 5 to 8 for each card or account type, to apply a surcharge value.
Press CANCEL to exit menu.
**Step 9**
Press **OK** to print surcharge summary receipt or **CANCEL** to exit.

In addition to Mobile 3G connectivity, the following communication options are available on NAB EFTPOS Mobile terminals:

- Broadband internet via Ethernet
- Broadband internet via Wi-Fi
- Dial Up

Merchants must have:

- Release 3.14 software (or higher) downloaded on their terminals for the different communication options to be available.
- Broadband and/or dial up capability set up in store according to the communication requirements for the terminal (refer to Requirements for different communication options on NAB EFTPOS Mobile terminals on page 92).

The terminal must have:

- Been set up for the communication options that may be used by the terminal
- Been paired with the base to allow Bluetooth to work with broadband internet and dial up communication options

Contact the Merchant Service Centre or Integrated Help Desk to assist with setting up the terminal for a new communication method or pairing the terminal and base for Bluetooth.

Once the initial set up has been completed, the merchant can switch between the communication options on the terminal at any time as required.
## REQUIREMENTS FOR DIFFERENT COMMUNICATION OPTIONS ON NAB EFTPOS MOBILE TERMINALS

Requirements for Different Communication Options on NAB EFTPOS Mobile Terminals

All communication options come configured on new terminals and when a new terminal is installed, it will be set up to operate on either 3G Mobile (GPRS) or the merchant’s preferred communications option that already exists in store.

It is possible to switch to a different communications option after the terminal has been installed, provided that the facility has been set up in store according to the terminal requirements. When these facilities are available in the store, the merchant may initially need assistance from the Merchant Service Centre or Integrated Help Desk to ensure that any specific configuration settings required for that store are set up for the terminals.

### What you need to know about each communication option

<table>
<thead>
<tr>
<th>Option</th>
<th>Communicates with NAB using...</th>
<th>What you need to use this option</th>
<th>Limitations with this option</th>
<th>Who can use this option</th>
</tr>
</thead>

</tr>
<tr>
<td>Broadband Internet via Ethernet</td>
<td>The internet, using an Ethernet cable</td>
<td>A router^ with an internet connection and an Ethernet cable.</td>
<td>If using a store network, you need to plug the terminal base in via an Ethernet cable. #See note below re Firewall/security filtering and network configuration requirements</td>
<td>Everyone with internet access. This is the fastest option for transacting.</td>
</tr>
<tr>
<td>Broadband Internet via Wi-Fi</td>
<td>The internet, using a Wi-Fi hotspot</td>
<td>Wi-Fi hotspot and Password. #See note below re Firewall/security filtering and network configuration requirements</td>
<td>Connecting to a public Wi-Fi network may impact transaction processing</td>
<td>Everyone with internet access plus a Wi-Fi hotspot</td>
</tr>
<tr>
<td>Dial Up</td>
<td>A dedicated phone line^</td>
<td>A dedicated Analogue or PSTN phone line^ Do not use dial up via NBN</td>
<td>Slower communication and functionality download times</td>
<td>Anyone in a 3G network weak spot^ or without access to the internet or Wi-Fi</td>
</tr>
</tbody>
</table>

^ The merchant should contact their Internet provider to help them set up Broadband Internet or dial up facilities in store. NAB does not provide routers or assistance with setting up Internet access in store.

# For Broadband Internet Ethernet and Wi-Fi connection, you need to configure your network:

- to enable DHCP
- WPA2 secured network – Wi-Fi only
- if your outbound internet connection is filtered via a firewall or any other security appliance, update your security appliance or firewall to allow traffic to the following URL and Port Numbers:
  - **URL:** prodnabposna3000.nab.com.au
  - **Port:** 7000-7034
SWITCH TO A DIFFERENT COMMUNICATION OPTION

**Step 1**
Press 4 in the **Menu** to select Terminal

**Step 2**
Press 4 to select Host Comms

**Step 3**
Use the F2 and F3 buttons to scroll to the communication option and press ENTER

**Note:** There will be a slight delay while the terminal connects to the new communication network.
PAIR THE TERMINAL AND BASE FOR BLUETOOTH

The terminal and base must be paired for Bluetooth before dial up or internet communication options can be set up on the terminal.

To Check if the Base and Terminal are Already Paired

Step 1
Check for the Bluetooth symbol in the status header bar at the top of the terminal screen

- If the Bluetooth symbol is displayed but shows grey, go to step 2.
- If the Bluetooth symbol is not displayed at all, it indicates that you may need to update the version of the software on your terminal. Contact the Merchant Service Centre or Integrated Help Desk for help with this.

Step 2
Remove the terminal from the base, then check if the Bluetooth symbol shows green.

- If the Bluetooth symbol shows green, it indicates that the terminal is currently communicating with a base via Bluetooth. This means the terminal is paired with the base.
- If the Bluetooth symbol remains grey, go to step 3.

Step 3
Check that the power to the base is turned on and that the power cable is connected correctly.

Step 4
Return the terminal to the base and check the power symbol on the terminal screen to check that it is charging.

Step 5
Remove the terminal from the base again and check if the Bluetooth symbol shows green.

- If the Bluetooth symbol still remains grey, it may indicate that the terminal is not paired with the base for Bluetooth. Contact the Merchant Service Centre or Integrated Help Desk for help with pairing the terminal and the base.
PAIR THE TERMINAL AND BASE FOR BLUETOOTH (CONTINUED)

To Pair the Terminal and the Base for Bluetooth

When you contact the Merchant Service Centre for help to pair the terminal and base for Bluetooth, they will help you to work through the following steps.

Step 1
Check for the Bluetooth symbol in the status header bar at the top of the terminal screen.

Step 2
Press 4 to select Terminal.

Step 3
Press 3 to select Others.
PAIR THE TERMINAL AND BASE FOR BLUETOOTH (CONTINUED)

**Step 4**

Press 3 to select Manager Menu.

**Note:**
- If user presses Menu button on keypad, option 3 displays as Manager Menu and option 4 as Delete All pre-Auth.
- If user presses Menu button on touch screen, option 3 displays as Delete All pre-Auth.

Step 5

Enter the password and press ENTER

**Note:** The default password is 1234, unless you have changed it with the Merchant Help Desk.
PAIR THE TERMINAL AND BASE FOR BLUETOOTH (CONTINUED)

Step 6
Tap Control panel

Step 7
Tap Terminal settings

Step 8
Tap Communication means

Step 9
Tap Bluetooth
**PAIR THE TERMINAL AND BASE FOR BLUETOOTH (CONTINUED)**

**Step 10**
Tap Base

**Step 11**
Tap Association

- If the base and terminal are paired successfully, the **Association Complete** confirmation message displays. Go to the next step.
- If the base and terminal are not paired successfully, the **Association Incomplete** message displays. If this occurs, repeat all of the above steps to pair the base and terminal for Bluetooth.
PAIR THE TERMINAL AND BASE FOR BLUETOOTH (CONTINUED)

Step 13

A message displays on the terminal to warn that the terminal will reboot

This message is displayed only on terminals with release 0.3 X and 0.5 X. Not applicable to terminals running 0.7 X release

The terminal reboots automatically.
PAIR THE TERMINAL AND BASE FOR BLUETOOTH (CONTINUED)

Step 14
The Idle screen rediscplays with the Bluetooth symbol in the status header bar of the terminal.
SET UP THE TERMINAL FOR DIAL UP COMMUNICATION

The merchant must have a land line in store.

If the merchant does not have this available, the merchant must speak to their telephone provider to help set this up before proceeding.

Make sure that the base and terminal have been paired for Bluetooth (refer to Pair the terminal and base for Bluetooth on page 94).

**Step 1**
Remove the cover from the bottom of the base and plug the telephone land line into the Phone IN port in the terminal base.

**Step 2**
On the terminal, press the **Menu** button then press **4** for Terminal, then **4** for Host Comms, then select **Dialup** to switch the communications option to Dialup (refer to Switch to a Different Communication Option on page 95).
SET UP THE TERMINAL FOR BROADBAND INTERNET VIA ETHERNET COMMUNICATION

The merchant must have Broadband Internet available in store and have an Ethernet cable.
If the merchant does not have Broadband Internet available, the merchant must speak to their telephone provider to help them set this up.
Make sure that the base and terminal have been paired for Bluetooth (refer to Pair the terminal and base for Bluetooth on page 94).

**Step 1**
Plug the Ethernet cable into the back of the base

![Image of Ethernet cable connection](image)

**Step 2**
On the terminal, press the Menu button then press 4 for Terminal, then 4 for Host Comms, then select ETH to switch the communications option to Ethernet (refer to Switch to a Different Communication Option on page 95).
SET UP THE TERMINAL FOR BROADBAND INTERNET VIA WI-FI COMMUNICATION

The merchant must have access to a Wi-Fi hotspot.

If the merchant does not have access to a Wi-Fi hotspot, the merchant must speak to their telephone provider to help them set this up.

Make sure that the base and terminal have been paired for Bluetooth (refer to Pair the terminal and base for Bluetooth on page 94).

Call the Merchant Service Centre to help direct you through the steps to set up the terminal for Broadband Internet via Wi-Fi.

**Step 1**
Press 4 in the Menu to select Terminal

**Step 2**
Press 3 to select Others

**Step 3**
Press 3 to select Manager Menu.

Note:
- If user presses Menu button on keypad, option 3 displays as Manager Menu and option 4 as Delete All pre-Auth.
- If user presses Menu button on touch screen, option 3 displays as Delete All pre-Auth.

The merchant copy of the voided receipt will print automatically.
Step 4
Enter the password and press ENTER
Note: The default password is 1234, unless you have changed it with the Merchant Help Desk.

Step 5
Tap Control panel

Step 6
Tap Terminal settings

Step 7
Tap Communication means

Step 8
Tap Wi-Fi
**Step 9**
Tap **Enable**

**Step 10**
Tap **Scan networks** to find available hotspots

**Step 11**
Select the required network

**Step 12**
Use the onscreen keypad to enter the password for the selected Wi-Fi hotspot, then tap the green button to Enter.

**Step 13**
On the terminal, press the **Menu** button then press **4** for Terminal, then **4** for Host Comms, then select WiFi to switch the communications option to **WIFI**.

When the password is entered correctly the message **New Profile displays.** The Wi-Fi symbol in the status header of the terminal displays green.
## ADDITIONAL PINPAD FUNCTIONS

**Below are the additional functions you can complete on the PINPad**

**Note:** These functions are not available on your NAB EFTPOS Mobile terminal when your terminal is integrated with your POS.

**Step 1**
Press the **Func** key

**Step 2**
Press the corresponding **function number**

**Step 3**
Press **ENTER**.

The relevant function will display on the PINPad

STATIONERY ORDER
(ORDERING RECEIPT ROLLS)

You may order receipt rolls directly from your terminal. The stationery order will be sent after a logon or the next financial transaction. You will receive an order of 20 rolls within 2-5 business days.

**Step 1**
Press 4 in the **Menu** to select **Terminal**

**Step 2**
Press 6 to select the **Stationery Order**

**Step 3**
Press **ENTER** to order receipt rolls

**Step 4**
A message displays to confirm the order has been submitted
**CHANGING THE RECEIPT ROLL**

**Step 1**
Open the paper compartment by lifting the catch located at the top of the contactless landing zone, and pull the cover to the rear of the terminal

Lift catch up

Pull cover open

**Step 2**
Insert the paper roll into the compartment, as shown below

**Step 3**
Pull the paper up towards the top of the terminal

**Step 4**
Maintain the paper and close the cover

**Step 5**
Press simultaneously on both upper corners of the contactless landing zone, as shown by red arrows below, until it clips into position

**Step 6**
If required, press the **Feed** key on the keypad to advance the paper
## COMMON ERROR MESSAGES

ELECTRONIC FALBACK PROCEDURE

Visa, Mastercard and EFTPOS chip floor limit rules have changed. A generic floor limit to allow the card chip to approve transactions without communicating with the NAB system or the Card Issuer system, no longer applies.

All transactions are processed by the terminal communicating with the NAB system and the Card Issuer system. In the event either of these 2 systems are unavailable, the terminal may resort to Electronic Fallback (EFB) transaction processing if the function is enabled.

The number of transactions processed in EFB mode will be displayed in the bottom left corner of the terminal screen, where #nnnn refers to: nnnn refers to the number of transactions in EFB mode. These transactions will be sent to NAB when communication with NAB is restored.

# refers to pending reversal transactions and for these transaction, please call the Merchant Help Desk on 1300 369 852 for assistance.

When the terminal processes transactions in EFB mode, it may prompt for an approval authorisation code to be entered on the terminal. For authorisation code, call 13 25 15. Please have your store number ready as you will need it to obtain an authorisation code. If unsure of your store number, please call the Merchant Help Desk.
In the event your terminal is unable to communicate with NAB, you may need to revert to manual transactions. To complete a manual card transaction, please follow the steps below:

**Completing the transaction**

- Confirm that the card is a Visa or MasterCard.
- If Diners or AMEX – refer to relevant guides provided by Diners or AMEX.
- If it’s a Bank owned Debit Card – ask the cardholder for another form of payment.

**NOTE:** Scheme (Visa/MasterCard) Debit cards are accepted.

- Check the validity dates (expiry date) on card.
- While the cardholder is present:
  - Phone NAB Key Auth 13 25 15. You will need:
    - the cardholder’s card
    - Sales Voucher
    - NAB Store Number

**NOTE:** The Store Number can be found on the first line engraved on the metal plate at the bottom left corner of the imprinter.

- Select option 4 (Purchase) by keying the corresponding option number into your telephone keypad.
- Follow the prompts, and key the details into your telephone keypad when requested:
  - the transaction type – card present, mail order/telephone order, Internet, purchase, or recurring transaction,
  - the amount of the sale in dollars and cents,
  - cardholder’s account number in full,
  - expiry date on card.
- If the request is approved you will be given an authorisation number that must be recorded in the appropriate space on the Sales Voucher (refer to next paragraph “How to complete a sales voucher”).

**Important Note!** Do not bank the voucher, the transaction is automatically processed, you just need to store the approved voucher for 18 months in accordance with the Payment Card Industry Data Security Standards and the Merchant Agreement Terms & Conditions.

- If the request is declined:
  - request alternative payment from the cardholder, and
  - advise the cardholder to contact the card issuer (do not provide any reason for the authorisation request being declined).

**Completing a Sales Voucher**

- Place the card face up in the imprinter.
- Place the Sales Voucher face up in the imprinter over the card.
- Firmly slide the imprinter handle across the Sales Voucher, returning it to its original position.
- Retain the cardholder’s card until the transaction has been finalised.
- Remove and destroy the cover sheet of the Sales Voucher. Ensure card and merchant details are clearly imprinted on all copies.
- Fill in the date, a brief and specific description of the goods/services, and the amount of the sale. Tick the box applicable to the credit card type (MasterCard/Visa) and initial. Ask the customer to sign the Sales Voucher.
- Compare signature on the Sales Voucher with the signature on the card.

**For further assistance**

24 hours a day, 7 days a week or visit [www.nab.com.au](http://www.nab.com.au)
TERMINATION OF EFTPOS MERCHANT SERVICE

Should you elect to terminate your EFTPOS merchant service with NAB, you will need to call the Merchant Service Centre to arrange for all terminals, printers, power packs and cabling to be picked up from you. You will also need to return your imprinter and any unused stationery.

A fee may be charged for early termination/closure or where all equipment is not returned to NAB.

Failure to complete this process will see fees continue to be charged to your account until completion.

Fees will be charged in accordance with the Merchant Agreement and Letter of Offer. Terminal rental fees are charged per calendar month or part thereof. There are no refunds or pro rata calculation of terminal rental fees should you return a terminal or terminate your Merchant Agreement part way through a billing period.
